

We at **J&J Technology Consulting** are proud to announce MergeWare as our software product line for various software packages under development. Because we understand how your business is challenged with managing multiple systems and technologies, we are working to help you bring each piece together to function effectively as one! MergeWare software suite provides you with solutions that will bridge the gap between your systems and your workflow.

The **J&J Technology Consulting** team is comprised of highly skilled individuals focused on client satisfaction. The extensive knowledge within the team allows for specialized expertise, no matter what the project needs may require.

- We offer network solutions to meet your needs. From ground up network topology design, to simple server migration, rotation and/or addition, we help you manage your network and apply our experience to help you succeed.
- Our team also has extensive experience in application development. By utilizing industry standard development tool sets, we customize applications to your specifications and provide detailed documentation along the way.

J&J Technology Consulting team would like to partner with your organization in driving your initiatives, strategies, and operations based projects. We'll work hand in hand in planning, implementing, and cross-training with your existing team, or as a turn-key solution.
